Assignment 3 – 15%

Total 15 marks

15 Marks – Creating a Contact directory App using Recycler View.

- Create an android application that contains a Recycler View of Contacts.
- Each contact should have an image.
- Each contact should have a name.
- Each contact should have an email address.
- Each contact should have cell phone number.
- App should have at least 50 contacts out of which at least 10 contacts should be distinct.
- At least one contact should be student name, and college email address. (Please do not add you picture or actual contact number)

Students are given freedom to use any layout and design the app to their own imagination.

Please complete the task, and record the screen with the output, and upload it to LearnSeneca along with the app folder of your android app.
